

Program Name:	St. Jude-VIVA Survivorship Series 4 Webinar #7
Event Date:	Friday, 19 June 2026
Event Time:	8:00pm – 9:30pm (Singapore Time)

Programme Synopsis

Lecture Title:

Australia's Contribution to Advancing Expertise in Adolescent and Young Adult Oncology

Dr Jeremy Lewin, Peter MacCallum Cancer Centre

Lecture Title:

Addressing the Needs of Adolescent and Young Adult Survivors of Childhood Cancer in the Transition to Adult Care

Dr Katie Devine, Rutgers Cancer Institute

Many young adult survivors of childhood cancer are lost in the transition from pediatric to adult healthcare. This work describes the development and iterative testing of a digital self-management and peer mentoring intervention to improve self-management skills in this population. A series of studies were conducted to develop and refine the “Managing Your Health” intervention, which is currently being tested in an ongoing randomized controlled trial. The lessons learned from preliminary work and implications for clinical care will be discussed.

Presenter Bio

Associate Professor Jeremy Lewin

**Medical Oncologist, Peter MacCallum Cancer Centre
Medical Director, Victorian Adolescent & Young Adult Cancer Service
Sir Peter MacCallum Department of Oncology, The University of Melbourne
Australia**

Jeremy Lewin is the Medical Director of the Victorian Adolescent & Young Adult (AYA) Cancer Service, a medical oncologist at the Peter MacCallum Cancer Centre and an Associate Professor at the University of Melbourne. He is co-director of the AYA service and has dedicated his career to improve the outcomes and experiences for young patients.

Jeremy's research focuses on high-risk AYA sarcoma subtypes, improving access to clinical trials for young people, and advancing models of quality cancer care. He has been actively involved in professional organisations, including the Royal Australasian College of Physicians, where he has championed the development of Adolescent & Young Adult Medicine.

He also holds leadership and strategic roles across a range of national and international organisations and is a frequent speaker at Victorian, Australian, and international forums on AYA oncology.

Dr Katie Devine

**Associate Director
New Jersey Pediatric Hematology and Oncology Research Center of Excellence (NJPHORCE)
Rutgers Cancer Institute
USA**

Katie Devine is the Associate Director of the New Jersey Pediatric Hematology and Oncology Research Center of Excellence (NJPHORCE) at Rutgers Cancer Institute and an Associate Professor of Pediatrics and the Section Chief of Pediatric Population Science, Outcomes, and Disparities Research in the Division of Pediatric Hematology/Oncology at Rutgers Robert Wood Johnson Medical School. She received her BS in human development from Cornell University. She earned her PhD in clinical psychology from the University of Georgia and completed a postdoctoral fellowship in

pediatric psychology at Loyola University Chicago. She earned her MPH from the University of Rochester Medical Center and is a licensed psychologist.

Moderator

Dr Yin Ting Cheung

**School of Pharmacy, Faculty of Medicine,
The Chinese University of Hong Kong
Hong Kong**

Dr. Yin Ting Cheung received her training in pharmacoepidemiology and cancer survivorship from the National University of Singapore (NUS) and St. Jude Children's Research Hospital (Memphis, USA). Currently, Yin Ting's research at the Chinese University of Hong Kong adopts a combination of epidemiological, translational and qualitative research approaches to characterise these drug-induced toxicities, particularly in adverse outcomes related to neurocognitive and behavioral functioning. She has initiated research/commissioned projects for the Childhood Cancer Survivors Study (USA), the Chinese Children's Cancer Group (China), the Multinational Association for Supportive Care in Cancer (MASCC) and the Hospital Authority (Hong Kong), as well as NGOs serving children with cancer. She is an expert member on the Children's Oncology Group (Neuropsychology Panel), the Vice Chairman of the MASCC Pediatrics Study Group, and a member of the steering committee on the International Pediatric Oncology Guidelines in supportive care (iPOG) Network. She hopes that her collaborative research with students, clinicians and scientists can help to improve health outcomes in survivors of cancer.
